“

It is easier to write on a young child's mind, which is a blank slate, rather than erase and try to rewrite at a later stage.

”

For the past two decades, Little Genius has enriched more than 15000 young minds with specialised English language, reading and, communication skills. It is combined with programs designed to enhance children's knowledge of the world & its events, and mathematical literacy.

Strong Foundation, Bright Future

Our aim is to transform today's young learners into confident leaders. These successful global citizens will leave a lasting impression in a world where the knowledge of 'hows' and 'whys' will play a pivotal role.

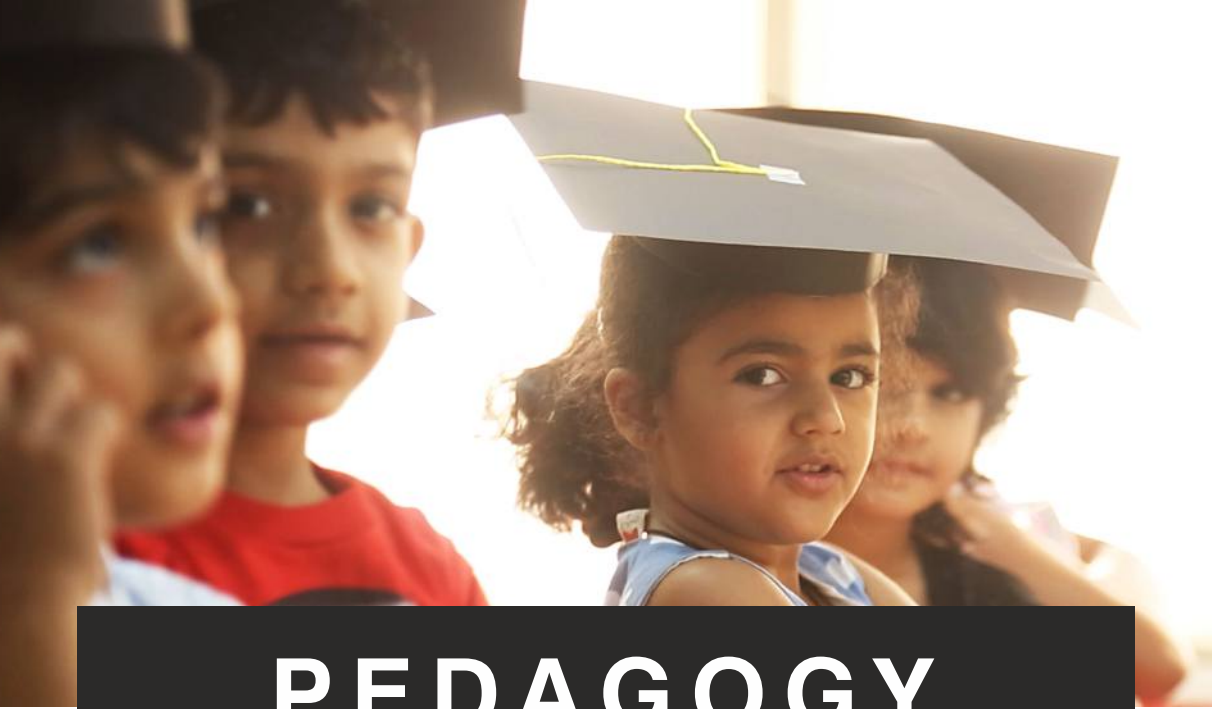

Little Genius is not a tuition class, and our curriculum goes beyond regular school learning. By substituting rote with logical reasoning, we encourage children to delve deeper into the subjects; igniting curiosity and creativity. We believe that children must learn concepts the correct way. Through scientifically-designed systematic learning programs, children learn to turn challenges into opportunities.

PEDAGOGY

How does Little Genius help a child develop leadership abilities?

Our programs give kids the confidence to share ideas in groups or express their views in a public setting. Great leaders communicate their ideas in a clear, concise and well articulated manner. The Math World program also helps develop abilities of logical reasoning, process writing and problem solving in a methodical manner to take smarter decisions.

Little Genius teaches kids the fundamentals with meticulously designed programs. They integrate learning with fun, ensuring that learning is not a burden. By conducting sessions for only two hours a week, we aim to maximize learning with minimum effort. Our programs focus on understanding instead of rote. This ensures optimal learning efficiency, as well as long term retention.

The Little Genius Online Experience

Optimized content for studying on small screens

Visual, interactive lessons for in-depth understanding

1 hour sessions, twice a week for decreased screen time

1:1 tutor-student interaction, even in group classes

Continuous and comprehensive evaluations

- Regular, individual feedback to monitor progress
- Tutoring sessions for 1:1 doubt resolution
- Homework sheets for revision and practice
- Available on mobile phones, tablets, laptops and desktops

Foundation Building Programs in Phonics:

Basics and Advanced

These are programs designed to develop Phonic Skills and Phonemic Awareness. These courses build strong phonemic and phonological awareness. Children are taught to hear, identify, and manipulate the smallest units of sound that can differentiate the meaning of a given word. They learn to harmonize and de-harmonize sounds to build words. Children move from 'reading the lines' to 'reading between the lines.' Students are trained to read age-appropriate books, construct sentences, and solve comprehensions.

Vocabulary, Olympiads

1

Level 1 to Level 3

Grammar is the glue that holds a language together. And vocabulary adds the sprinkles that make us smile and weep and shriek in glee. The English Enrichment Program helps children with their receptive and expressive language skills. They are able to express themselves in more complex ways and transition into confident communicators.

Advanced English Enrichment

Level 4 to Level 6

Knowledge of grammar brings the desired structure and meaning to the language. This knowledge is best achieved when the grammar system of the language is applied to reading, writing and speaking. The Advanced English Enrichment Program encourages the students to apply what they already know about grammar and use it in their own speech and writing. When learning begins early, the fundamentals are consolidated better. The learning curve smoothens and results in a strong foundation.

**Phonics &
Phonemic Awareness,
Reading,
Comprehension Skills**

2

Our 'Phonics & Phonemic Awareness' program teaches the fundamentals of word building, reading, and comprehension skills. The intensive course boosts confidence, increases fluency, and builds strong reading stamina. It empowers children to read with speed, understanding, and accuracy. There are six Reading Circles, covering concepts from beginner to advanced complexity.

Mathematics,
General Knowledge,
Analytical Reasoning,
Critical Thinking,
Olympiads

3

Mathematics and Numeracy

Mathematics is the language in which logic is written. Logic helps you solve problems and make the right decisions. It is only when you can read the language of logic, can you lead with logic.

Mathematics and numeracy are core competencies. By engaging in mentally stimulating problems, children begin to understand mathematical language and then use it to talk about their work. This practice lays the foundation for real-life problem-solving.

Mathematics,
General Knowledge,
Analytical Reasoning,
Critical Thinking,
Olympiads

3

My Wondrous World

Children often ask profound questions about themselves and the nature of the world around them.

Why is the ocean salty?
Why do we see rainbows?
How do butterflies undergo metamorphosis?

This area of learning helps children find age-appropriate answers to some of these questions and also ignites new ones.

Mathematics,
General Knowledge,
Analytical Reasoning,
Critical Thinking,
Olympiads

3

Gearing up for the Future

Big data, machine learning & artificial intelligence, hold the keys to our future. It is imperative for children to develop quantitative aptitude and computational ability.

The Math World program helps children think with and visualize data. They calculate and solve analytical problems which helps them prepare for international olympiads. The iterative processes which they learn also form the fundamentals for coding and software skills.

COURSES

Mathematics,
General Knowledge,
Analytical Reasoning,
Critical Thinking,
Olympiads

3

The Math World program seamlessly integrates mathematics, analytical reasoning, logical thinking, and knowledge of the world.

The course encourages a child's natural curiosity through exploration-based learning and planned activities across mathematics, arts, geography, history, science, and technology.

**JUNIOR
CEOs**

**Business Management
Skills for Kids**

4

Age Group: 10 - 14 Years

Junior CEOs is a business management program designed for kids. Academic success alone is not enough to build tomorrow's business leaders. Developed by IIM alumni, this unique interactive program teaches the key fundamentals of business like entrepreneurship, marketing, financial literacy, advertising & promotion, and leadership traits. This activity-based dynamic program allows students to brainstorm and pitch ideas to solve real-world business problems. It empowers kids to think innovatively, learn how to overcome obstacles, and hone their business acumen.

“Each problem you face is a potential business opportunity.”

Course Format: Fun and engaging, interactive online classes of 90 minutes, once a week. Includes role-play, group discussions and guest sessions by industry insiders.

Free-of-cost program for
underprivileged kids

5

Nanhe Ustaad is our dream project through which we attempt to pass on our love and support to the less privileged kids.

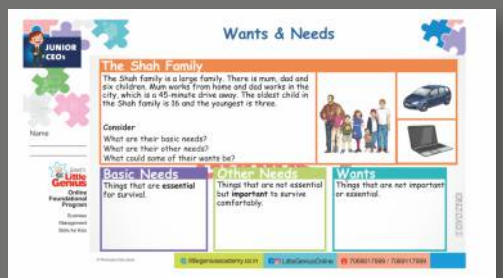

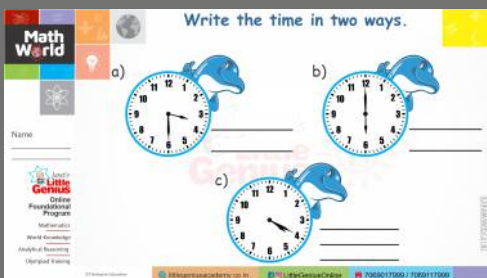

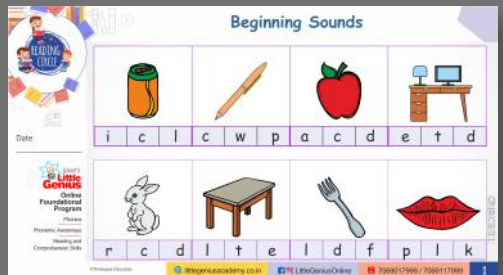

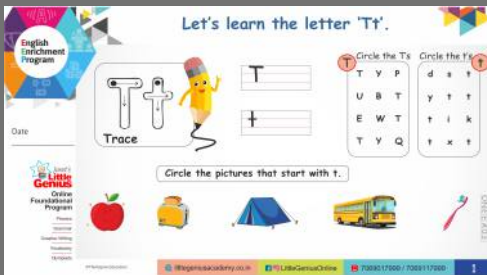

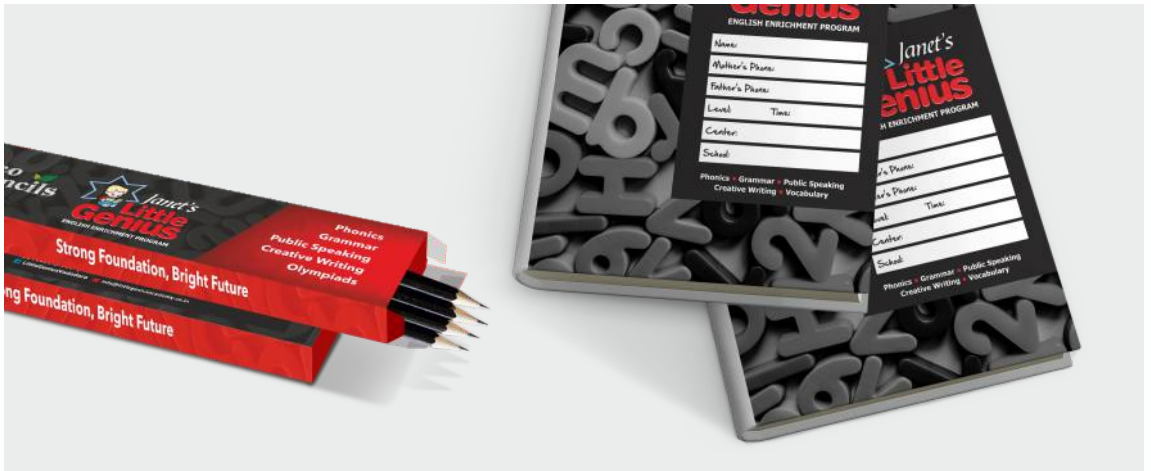

It is a free-of-cost, specially designed English education program for grades Jr KG to 8th grade. We hope that our resources and support can help our Nanhe Ustaads lay a strong foundation for a successful future.

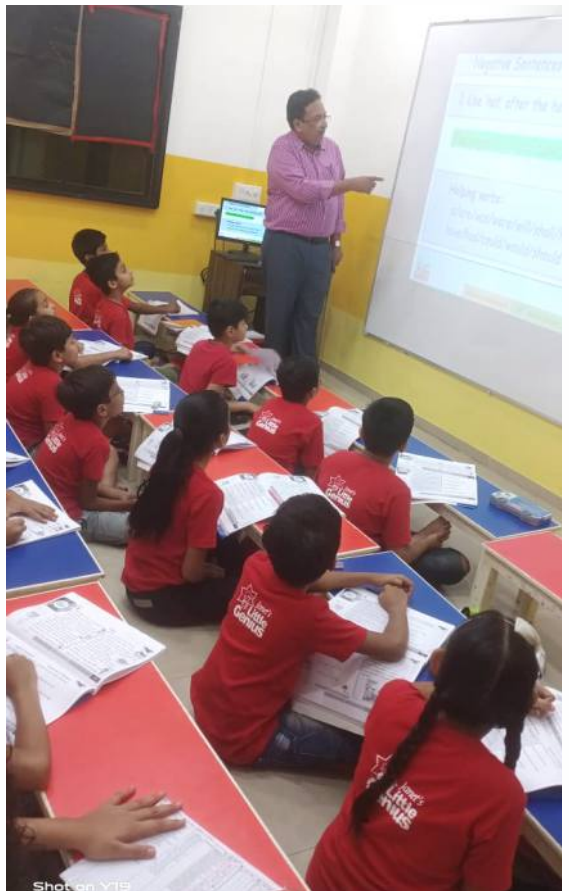

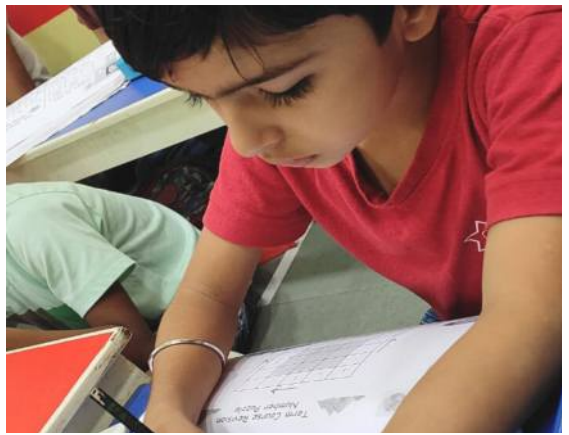

In its first year of operation, Nanhe Ustaad has helped over 50 students take a few steps toward achieving their true potential.

The program has expanded to include online learning. We urge one and all to spread this message to those less privileged children who yearn and deserve to be Nanhe Ustaads.

DIRECTORS

“

**I am a teacher
by chance,
an educationist
by choice.**

”

JANET SHAH
Founder

Janet Shah grew up in the U.S.A. Upon her return, she quickly realized that education in India needed to be more integrated and cohesive with a focus on independent learning. Her MBA helped her create scientifically designed programs, which focused on core concepts. Working with her own kids, she understood that there should be ‘fun in learning the fundamentals’. This is the guiding principle Little Genius is built on.

“
From reading
about history, to
writing history -
our children are
our future.”

TANYA SHAH
Co-Founder

Tanya Shah, an MBA from IIM-Indore, believes that education is the strongest catalyst for growth and change. Change must begin at our grassroots - our children. She is invested in helping equip them with the right skills, values and knowledge. These little leaders will be responsible for the world of tomorrow.
